MUHAMMAD USAMA

Full-Stack Software Engineer · MERN Stack Developer · Web Application Engineer

Karachi, Pakistan • Open to Remote (Worldwide) & On-site Roles in Karachi • +92 317 1323146
executive.onyx@gmail.com • linkedin.com/in/muhammad-usama-20a885342

PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in the MERN stack, with hands-on production experience designing and shipping SaaS platforms end-to-end — from multi-tenant database architecture to secure authentication and RESTful API design. Solo-architected, built, and deployed **Tummly**, a restaurant feedback and multi-location SaaS platform now live across 20+ UK sites, engineering an 18-endpoint API suite, JWT/OTP authentication, and a multi-tenant SQL Server schema from the ground up. Currently extending that foundation into distributed systems and applied AI — building **Netflix System Design**, a distributed video streaming platform (Kafka, Redis, FFmpeg, Docker), and an AI chatbot on Groq's LLM infrastructure. Comfortable owning a feature end-to-end, from Figma handoff to production deployment, in Agile, cross-border teams. Seeking a Full-Stack / MERN Software Engineer role — remote or on-site in Karachi.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), Angular.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite
Backend & APIs	Node.js, Express.js, RESTful API Design, ASP.NET Core (C#), PHP, Laravel
Databases	MongoDB, MongoDB Compass, MySQL, SQL Server, SSMS
Auth & Security	JWT, bcrypt, OTP Verification, Role-Based Access Control (RBAC)
Tools & Workflow	Git, GitHub, Postman, Docker Compose, npm, Nodemon, CLI, Agile/Scrum, Figma-to-Code
Design	UI/UX Design, Adobe Photoshop, Adobe Illustrator, Canva, WordPress Development

Currently building hands-on depth in distributed systems: Redis, Apache Kafka, FFmpeg (HLS transcoding) — via the Netflix System Design project below.

PROFESSIONAL EXPERIENCE

Full-Stack Developer – 5Sum Ltd. (Remote) Mar 2026 – Jun 2026

London, UK | SaaS Platform — React.js, ASP.NET Core, SQL Server

- Engineered full-stack features for a live SaaS product, translating Figma designs into pixel-perfect, fully responsive React.js components.
- Designed and built RESTful APIs bridging the React front-end with an ASP.NET Core back-end; implemented JWT-based authentication and role-based access control for multi-tier permissions.
- Diagnosed and resolved production issues, tested feature releases, and supported deployment cycles alongside a distributed engineering team.

PRODUCTION PROJECT

Tummly – Restaurant Feedback & Multi-Location SaaS Platform Solo Developer

React.js, ASP.NET Core, SQL Server, JWT, OTP Verification, REST APIs

- Solely architected, built, and deployed a production SaaS platform now live across 20+ restaurant locations in the UK.
- Designed a multi-tenant SQL Server schema and a REST API suite of ~18 endpoints; implemented JWT + OTP authentication with role-based access across multiple user tiers.
- Built dynamic QR-code generation and a guest feedback system with a fully responsive, production-grade UI.

FEATURED PROJECTS

Netflix System Design – Distributed Video Streaming Platform

React.js (Vite), Node.js/Express, MongoDB, Redis, Kafka, FFmpeg, Docker Compose

- Architecting a full-scale distributed streaming platform end-to-end: adaptive video transcoding, content delivery, and horizontally scalable backend services.
- Building an FFmpeg-based transcoding pipeline with HLS adaptive streaming, Kafka-driven event processing, and Redis caching for low-latency delivery.
- Owning the complete system — frontend, backend, database, and containerized Docker Compose deployment — as a self-directed distributed-systems portfolio project.

AI Chatbot Platform – Groq-Powered LLM Assistant

- Building a full-stack AI chatbot (React.js, Node.js/Express, MongoDB) integrating Groq's LLM APIs for fast, low-latency conversational responses, with a React chat interface and session storage.

EDUCATION & LANGUAGES

Advanced Diploma in Software Engineering
Aptech Learning, Pakistan | Matriculation (Computer Science)

English – Professional Proficiency
Urdu – Native
